EXPERIENCE

•SOFTWARE DEVELOPER - PORTLAND, OR - 2023

Developed a WinForms App for a local business to keep employee records, schedule jobs, communicate with employees and handle logistics. With an updateable employee database it's easy to select the employee(s) for a job and send them the details by text, email or both with one click. An auto-updated calendar makes for easy scheduling. A list of dates with job type and description updates for easy reference. What used to be something of a headache is now a breeze and a more efficient use of time. Written in C# and SQL. Your more than welcome to check it out here. [AUTOSTAGER](#)

•WEB DEVELOPER - PORTLAND, OR - 2023

Created a website for a local Artist using ASP .NET CORE to showcase their art pieces and promote sales. Written in HTML, CSS, JAVASCRIPT, and C# along with JQUERY.

•WEB DEVELOPER - PROSPER IT CONSULTING - PORTLAND, OR --REMOTE-- 2022

Worked on a remote development team for a project that was managed using Agile/Scrum methodologies. Organized into two-week sprints with an initial planning meeting and daily stand-ups, ending with a code retrospective utilizing Discord. The project was an interactive website for managing the content and productions for a stage theatre company and was built using ASP.NET MVC and Entity Framework with a Code-first approach. Project management was accomplished through Azure DevOps and ultimately merged to the main branch of a Git repository. Extensively utilized Git version control and wrote code in HTML, CSS, C#, SQL, JavaScript and a little help from bootstrap..

•WEB DEVELOPER - PROSPER IT CONSULTING - PORTLAND, OR --REMOTE-- 2022

I worked with a development team to create a dynamic web application that allows a user to create, review, update and delete information.(CRUD). The primary languages I used during this project were Python, HTML, CSS and the Django framework. I also utilized Git, Azure DevOps and Discord to coordinate with my team. This involved both front and back end work.

-First Aid/ CPR
-Intensive Fire Fighter Training
-Immersion Suit and Survival Course
-Safety and Navigation Training

-Neenah High School Neenah, Wisconsin Diploma

ABOUT

There's something about programming that will always excite and intrigue me. I've got a good attitude and am easy to work with. Great in a team environment or an independant project. I find joy in my work and I love a good challenge. I'm ready for what's next and eager to grow.

OBJECTIVE

To find a mutually beneficial position that will challenge me and encourage growth.
